

**Unlock  
the future**

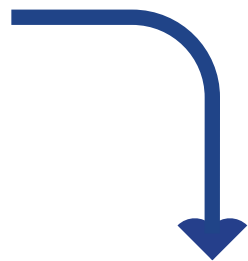

**of the  
circular  
bioeconomy  
in Europe**

# A public-private collaboration

Key to structure new industrial sectors like the bio-based industries.

## Public investment

Reduces the risk of investing in cutting-edge technologies

# For a greener future

CBE-JU funds projects advancing competitive, sustainable, and circular bio-based innovations in Europe.

Bio-based industries replace non-renewable fossil resources, with **renewable bio-based products and materials from waste and biomass** to produce industrial and consumer goods.

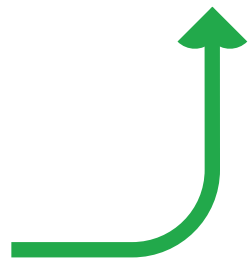

€2 billion partnership

**Circular Bio-based Europe**  
Joint Undertaking

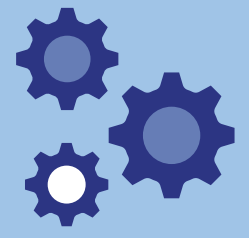

## Private vision

Provides the skills and knowledge to fulfil market demands

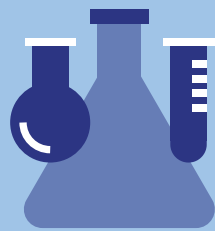

This way, they will help Europe become the **world's first climate-neutral continent, while increasing the sustainability and circularity** of production and consumption systems.

**Together,  
with a shared  
purpose**

Engineers

Scientists

Entrepreneurs

Business  
specialists

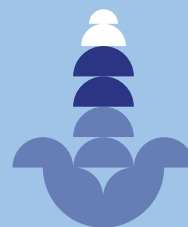

Investors

Local  
authorities

Policymakers

Primary  
producers

Bio-based Industries  
Joint Undertaking

CBE JU builds  
on the success of its  
predecessor Bio-Based  
Industries Joint  
Undertaking (BBI JU),  
which helped to position  
Europe as the world's  
bioeconomy leader.

# **Towards a more sustainable Europe**

## **Our projects are expected to contribute to:**

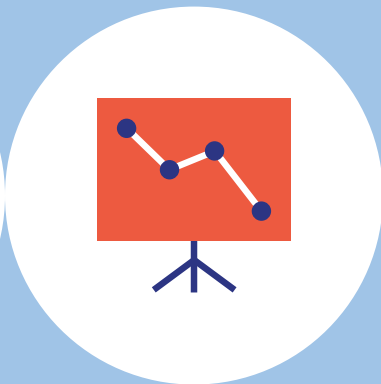

- Reduce Europe's dependence on fossil resources
- Support the achievement of the climate goals
- Combat pollution
- Protect and enhance biodiversity
- Deploy a fair transition to the green economy

# Addressing the current challenges of Europe's bio-based sector through:

Supporting research and innovation for sustainable bio-based solutions

Addressing technological, regulatory, and market challenges

Placing sustainability at the heart of its operations

De-risking investments in innovative, circular bio-based production plants

Strengthening the collaboration of all bioeconomy actors via open innovation

**Drive the change and work with us to unlock the future of the circular bioeconomy in Europe**
