

Biography

- **(Title) First name and last name:** Prof. Dr.-Ing. Sandra Krommes
- **Current Company/University/Employer:**
Rosenheim Technical University of Applied Sciences
- **Current position:** Chair of Resource Management, Head of the Research Group Sustainable Engineering & Management
- **Short CV with details of your most important experience and expertise**

Sandra is a Full Professor at the Rosenheim Technical University of Applied Sciences. She leads the group Sustainable Engineering and Management. In the field of bioeconomy, her focus is on the economic and environmental assessment and modelling of wood and natural fiber-based circular economy and recycling. She is part of the National Transfer and Acceleration Project for the Bioeconomy in Germany. Her research team focusses on circular economy (bioeconomy) projects to close industrial and EoL waste streams and to reduce resource consumption. She worked for more than 14 years in research and management positions in the automobile industry (BMW AG) in the fields of sustainable product engineering, environmental corporate and product strategy, and business development. She graduated in Economics, and holds a Diploma of Engineering and a PhD from the Technical University of Berlin (TUB).
